Catalyst Proposal List

Catalyst Fund 13

Introduction

This is the fourth time the Minswap DAO will be voting on Catalyst with the ADA in its Liquidity Pools, which was **53mn ADA** at the time of snapshot. The same process will be followed for this current Fund 13 as it was used for Fund 12 and others. You can see the documents and procedures followed for previous Funds [here](#).

A group consisting of Minswap community managers and Cardano community volunteers collaborated to filter the 1000+ proposals down to the more manageable number of **50 proposals**. This group of volunteers had to balance the interests of the projects providing and incentivizing Liquidity on Minswap, the Minswap protocol, and the Cardano (mainly DeFi) ecosystem as a whole.

Here is the List of the volunteers and their Twitter for accountability:

- [STLL](#)
- [QCPOL](#)
- [DEGAS Pool](#)
- [Redpa](#)
- [Alfa Pool](#)
- [Amir](#)
- [Cryptofly777](#)
- [Skylone](#)
- [GT](#)
- [HeptaSean](#)
- [Diegomac](#)
- [Mezuny](#)
- [Vibes](#)
- [CWSchub](#)
- [Purrito](#)

In addition, a new mechanism was added to the Catalyst Filtering process after being [approved by DAO Governance](#). This proposal suggested a new avenue for **15 Proposals** to make it to the Top 65 List based on their level of support of certain projects within the community, as well as metrics related to Minswap, such as Total Value Locked and trading volumes.

This avenue ranked Proposals based on a formula that combined two types of metrics. Qualitative metrics, measured as engagement metrics from a [promotional tweet campaign](#) and quantitative metrics: measured as Total Value Locked and trading Volume. This enhancement represented an independent initiative, designed to complement the existing catalyst review framework based on broader community feedback. You can see the results transparently in this [google sheet](#).

Guidelines

1. Inclusion of Minswap Labs Proposals: Minswap Labs is the development company that built and actively develops the Minswap DEX. We assume Minswap Liquidity Providers, as some of the active users of the platform are interested in these proposals.

2. Prioritization of Liquidity Partners on Minswap: large projects providing and incentivizing their own Liquidity on Minswap such as: Lenfi, Indigo Protocol, Iagon, Fluid Tokens, etc.
3. Prioritization of Proposals that will significantly impact and improve Cardano developer tooling
4. Prioritization of Proposals which will be open sourced
5. Prioritization of Proposals from teams with a history of delivering valuable tools for the Cardano community. Preferably teams who were previously funded on Catalyst, or that have delivered projects which are widely used by the community currently
6. Other common themes across the proposals include the need for audits and bug bounties, the goal of increasing DeFi usage on Cardano, the desire to strengthen liquidity in the ecosystem, empowering Cardano developers with open-source tools, and upgrading contracts for efficiency and functionality.

Filtering Procedure explained

The filtering approach followed three steps:

- 1. Stage 1 - Coarse Rejection:** Proposals were grouped together and summarized by a large language model. Groups of proposals were either rejected or accepted as follows: 2 people were randomly assigned to each group, and the goal was to evaluate the group of proposals where an accept means all are accepted and reject means all are rejected. If the two reviewers had a difference of opinion on accept or reject, a third reviewer was assigned. This helped to quickly remove large groups of proposals without having to look too closely at them.
- 2. Stage 2 - Specific Rejection:** All the proposals that passed through Stage 1, are taken, and decisions were made to reject proposals that clearly do not fit the criteria. As with the first round, two reviewers were assigned to each proposal. Ties for individual proposals were broken by a third reviewer.
- 3. Stage 3 - Specific Selection:** Of the remaining proposals, each reviewer picked 20 proposals that both fit the criteria and were of interest to the reviewer. Each selection gave a proposal a point, and points were tallied once all reviewers made a selection.

If you want more information, Elder Millennial, founder of Steelswap and long-time Minswap community member explains this method that he came up with in detail in this [interview with CatalystSwarm](#).

Data on Proposals Selected

Number of Proposals: 65

- **Cardano Use Cases:** Product (28);
- **Cardano Open:** Developers (22);
- **Cardano Open:** Ecosystem (1);
- **Cardano Partners:** Enterprise R&Ds (5);
- **Cardano Use Cases:** Concept (9);

Below, you can find each of the Proposals selected for the List. \$MIN Holders will **select the top 30 Proposals** on this List to be upvoted on Catalyst with Minswap LP \$ADA.

You can also find the Problem statement of each Proposal, a link to their full Proposal on Ideascale, the requested amount, and the scores obtained in 3 different areas through Catalyst Assessment.

Proposal Selection

F13: Cardano Use Cases: Product

1	
Proposal Title	Minswap Open Batching Protocol
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/129186
Solution	The Minswap OB model is designed to discourage malicious behavior from batchers by requiring them to have a stake in the DEX and making sure the system is designed so that batchers are accountable.
Requested Amount	460,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.50/5
Feasibility	4.44/5
Value for money	4.33/5
2	
Proposal Title	Minswap Lending Market – Long/Short
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/129176
Solution	Integrate Minswap with Cardano lending markets, enabling a seamless process to open long/short positions. This will simplify advanced trading, boost liquidity + accelerate DeFi adoption on Cardano.
Requested Amount	420,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.66/5
Feasibility	4.62/5
Value for money	4.14/5
3	
Proposal Title	Indigo x Minswap - Peg Stabilizing Liquidity Pools
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/130909
Solution	Implement a delegate-managed, algorithmic fee adjustment system for iAsset's liquidity pools on Minswap, enhancing stable asset peg stability and capital efficiency in Cardano's DeFi ecosystem.
Requested Amount	400,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.46/5
Feasibility	4.50/5
Value for money	3.96/5

F13: Cardano Use Cases: Product

4	
Proposal Title	Minswap x Mercuryo: Launching the first DCA on Cardano
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/132066
Solution	We will deploy our DCA product with Minswap. This includes connecting global payment methods in 150 countries and allowing users to use those to set DCA strategies on Minswap.
Requested Amount	150,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.04/5
Feasibility	3.74/5
Value for money	3.13/5
5	
Proposal Title	FluiDeFi - EVM/BTC wallets with any Cardano DApp
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/127583
Solution	You can control a Cardano-based smart account using Bitcoin or EVM wallets, allowing any Web3 user to access Cardano without needing a new wallet, starting with FluidTokens Dapp
Requested Amount	484,000 ADA
Catalyst Assessment Score	
Impact Alignment	3.98/5
Feasibility	3.69/5
Value for money	3.35/5
6	
Proposal Title	Yamfore V1 Smart Contract Security Audit I Big Blymp
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/131257
Solution	We will conduct a thorough audit of Yamfore V1's smart contracts, identify vulnerabilities, implement fixes, and publicly release the audit report to ensure security and transparency.
Requested Amount	180,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.20/5
Feasibility	3.96/5
Value for money	3.76/5

F13: Cardano Use Cases: Product

7	
Proposal Title	Optim + FluidTokens Borrow Protocol - OADA Lend/Borrow Market
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/131614
Solution	Develop the OADA Borrow Protocol to enable seamless OADA lending and borrowing against diverse collateral, enhancing capital efficiency and liquidity within Cardano DeFi.
Requested Amount	475,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.13/5
Feasibility	3.87/5
Value for money	3.65/5
8	
Proposal Title	Sundae Labs UPLC Debugger (Gastronomy): Feature upgrades and enhancements
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/131202
Solution	We will enhance our UPLC debugger with VSCode integration, improved UX, and speculative execution, providing developers with an intuitive, and powerful debugging experience for Cardano contracts.
Requested Amount	100,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.14/5
Feasibility	3.79/5
Value for money	3.36/5
9	
Proposal Title	Cexplorer 2.0: Newer, Faster, More Powerful
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/132776
Solution	Complete upgrade of Cexplorer to a whole new level of experience and functionality. We will significantly extend the existing features and capabilities for the benefit of developers, SPOs, and users.
Requested Amount	330,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.47/5
Feasibility	3.97/5
Value for money	4.03/5

F13: Cardano Use Cases: Product

10	
Proposal Title	Orcfax feeds integration of Xerberus risk ratings
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/129400
Solution	Orcfax will authenticate and publish the risk scores as a new feed type on the Orcfax explorer and will integrate their values with Xerberus' own risk explorer.
Requested Amount	341,250 ADA
Catalyst Assessment Score	
Impact Alignment	4.03/5
Feasibility	4.03/5
Value for money	3.64/5
11	
Proposal Title	Orcfax: developing the decentralized EchoNet
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/129397
Solution	EchoNet is the Orcfax side-chain which incorporates research on consensus, staking, and has been designed and optimized precisely for efficiency, sustainability, and dynamic participation.
Requested Amount	422,625 ADA
Catalyst Assessment Score	
Impact Alignment	4.18/5
Feasibility	4.14/5
Value for money	3.68/5
12	
Proposal Title	Orcfax API - on-demand publications
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/129392
Solution	Orcfax will make available its real time price data off-chain for integrators to query and develop an on-chain component allowing requests and payment for publication of that data.
Requested Amount	263,625 ADA
Catalyst Assessment Score	
Impact Alignment	4.20/5
Feasibility	4.41/5
Value for money	3.69/5

F13: Cardano Use Cases: Product

13	
Proposal Title	Cardano Multisig Platform by Mesh, Clarity DAO & Fluid Tokens
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/131036
Solution	We build a awesome open source multisig platform with a bunch of nice features, making it easy for collectives to engage at onchain governance and more
Requested Amount	500,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.26/5
Feasibility	4.37/5
Value for money	3.58/5
14	
Proposal Title	CHARLI3: Live API with all Cardano DEX aggregated data
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/131702
Solution	Use Charli3 Dendrite to extract on-chain pool depth, pricing, and trading data from all Cardano DEXs, every block. Create a database with aggregated processed data. Build an API endpoint integration
Requested Amount	246,750 ADA
Catalyst Assessment Score	
Impact Alignment	4.47/5
Feasibility	4.42/5
Value for money	4.49/5
15	
Proposal Title	Cardanoscan: Analytics Charts V2
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/132140
Solution	We will enhance the Cardanoscan analytics page by adding new charts, such as ADA circulation vs reserves, mempool size, stake key growth, and treasury growth, providing better insights to users
Requested Amount	44,000 ADA
Catalyst Assessment Score	
Impact Alignment	3.82/5
Feasibility	3.82/5
Value for money	3.59/5

F13: Cardano Use Cases: Product

16	
Proposal Title	Sundae Labs Credit Protocol powered by Gummiworm - Leveraging SundaeSwap V3 and Permissioned Liquidity Pools to bring real-world assets on-chain
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/131217
Solution	We will build a credit protocol on Cardano that tokenizes RWA's, by integrating SundaeSwap's DEX, Taste Test's automated price discovery, permissioned liquidity pools, all powered by Gummiworm.
Requested Amount	500,000 ADA
Catalyst Assessment Score	
Impact Alignment	3.93/5
Feasibility	4.03/5
Value for money	3.67/5
17	
Proposal Title	Orcfax development of composite oracle feed
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/129413
Solution	Orcfax will leverage its previously published on-chain data to publish composite prices (eg SMA) and will develop an auditable archival package with a full provenance chain for price-feed integrators.
Requested Amount	421,875 ADA
Catalyst Assessment Score	
Impact Alignment	4.24/5
Feasibility	4.19/5
Value for money	3.86/5
18	
Proposal Title	Onboarding Solana Ecosystem to Cardano via Rosen Bridge
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/130109
Solution	Connecting Solana to Cardano via Rosenbridge enhances market access by enabling cross-chain transactions and liquidity through seamless interoperability and decentralized financial ecosystems.
Requested Amount	500,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.50/5
Feasibility	3.86/5
Value for money	3.50/5

F13: Cardano Use Cases: Product

19	
Proposal Title	Levvy Plutus V3 upgrades and Token Lending/Borrowing
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/131413
Solution	We propose to develop a Plutus V3 smart contract powered addition to our platform that allows the safe lending of tokens for ADA providing leveraging opportunities for users.
Requested Amount	275,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.00/5
Feasibility	3.75/5
Value for money	3.54/5
20	
Proposal Title	MAYZ: Indexing Vending Machine
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/129904
Solution	MAYZ Protocol: A decentralized, permissionless platform for creating and managing Cardano investment funds. Enhancing ecosystem liquidity through innovative fund tokenization and swap mechanisms.
Requested Amount	200,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.43/5
Feasibility	4.25/5
Value for money	3.86/5
21	
Proposal Title	Decentralised Bridge connecting Cardano and Midnight using novel Zero Knowledge Proof relayer.
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/130704
Solution	Wanchain, with support from Midnight, will deploy decentralised cross-chain bridges to connect the Cardano mainnet and Midnight mainnet.
Requested Amount	500,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.00/5
Feasibility	3.50/5
Value for money	3.17/5

F13: Cardano Use Cases: Product

22	
Proposal Title	Revuto - The first CROSS-CHAIN SWAP on Cardano! Swap the most popular cryptocurrencies for Cardano Tokens and back in seconds like; BTC to IAG, SOL to SNEK, ETH to MIN, USDT to USDM ...
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/131893
Solution	Revuto has a non-custodial Cardano and custodial Crypto wallet, which makes it perfect to offer the first cross-chain swap feature in a single app on Cardano to easily swap top Crypto tokens for CNTs.
Requested Amount	370,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.05/5
Feasibility	3.79/5
Value for money	3.19/5
23	
Proposal Title	Revuto - PAY INVOICES issued in FIAT with Cardano Native Tokens from the Revuto app
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/131887
Solution	We will allow users to enter the invoice details issued in FIAT and pay it with Cardano tokens from the Revuto app. The product will bridge the gap between crypto liquidity and traditional finance.
Requested Amount	340,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.26/5
Feasibility	4.05/5
Value for money	4.11/5
24	
Proposal Title	Snek.fun v2 : Onboarding Cross-Chain Users to Cardano
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/132230
Solution	Enhance Snekdotfun with new features and implement marketing strategies to attract users from outside Cardano, tapping into an untapped market and driving user acquisition and community engagement.
Requested Amount	500,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.05/5
Feasibility	3.85/5
Value for money	3.10/5

F13: Cardano Use Cases: Product

25	
Proposal Title	Farmroll Accelerator: Complete Suite For Easy Token Launches On Cardano
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/131603
Solution	The Farmroll Launchpad will provide an all-in-one, user-friendly solution for token launches, covering social media, questing, claims/airdrops, token sales, and minting functionalities.
Requested Amount	260,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.28/5
Feasibility	4.33/5
Value for money	3.89/5
26	
Proposal Title	Anvil x Nuvola: 'C-Hub' - Bringing Collateralization to the Global Stage
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/129417
Solution	We propose to create a platform that would take rewards points such as airline miles, credit card points, hospitality points, etc. and turn them into an on chain reference that is saleable/tradeable
Requested Amount	437,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.06/5
Feasibility	3.50/5
Value for money	3.50/5
27	
Proposal Title	DexHunter One-Click Swaps
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/129216
Solution	Adding an in-platform balance functionality to DexHunter using non-custodial SC balances will allow faster trades, reduce transaction delays, and improve the overall UX.
Requested Amount	295,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.00/5
Feasibility	4.10/5
Value for money	3.65/5

F13: Cardano Use Cases: Product

28	
Proposal Title	Lenfi Voltaire: Enable ADA Liquidity for Drep delegation
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/130403
Solution	We will upgrade Lenfi to support permissionless ADA delegation to DRep via smart contracts. This will include integration from smart contracts to off-chain and UI.
Requested Amount	375,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.19/5
Feasibility	3.96/5
Value for money	3.35/5

F13: Cardano Open: Developers

1	
Proposal Title	Oura by TxPipe: going multi-chain
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/132070
Solution	Oura is a battle-tested Cardano-specific tool to observe and process on-chain events. We'll extend Oura's capabilities to support observing events from Bitcoin, Ethereum and Substrate.
Requested Amount	198,571 ADA
Catalyst Assessment Score	
Impact Alignment	4.58/5
Feasibility	4.42/5
Value for money	3.74/5
2	
Proposal Title	Maintain Mesh and Build Developer Community
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/131363
Solution	Maintenance and operations of the Mesh open source libraries and tool suits, maintaining discord dev support and core operations.
Requested Amount	200,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.00/5
Feasibility	4.26/5
Value for money	3.42/5
3	
Proposal Title	CShell by TxPipe: A Cardano wallet in your terminal
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/131966
Solution	A light, self-custodial, open-source wallet that runs on the terminal, enabling new capabilities for power-users around automation and programmability which can't be find in other wallets.
Requested Amount	197,143 ADA
Catalyst Assessment Score	
Impact Alignment	4.00/5
Feasibility	4.21/5
Value for money	3.74/5

F13: Cardano Open: Developers

4	
Proposal Title	Indigo Protocol: Typescript Off-chain SDK
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/131000
Solution	Develop an open-source SDK built on Anastasia Labs Lucid Evolution that allows developers to build transactions for many of the Indigo Protocol interactions: CDPs, Stability Pool, Staking, etc!
Requested Amount	200,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.06/5
Feasibility	3.81/5
Value for money	3.25/5
5	
Proposal Title	Anvil - Open Source - Universal Wallet Connector (Weld) for Unity, Godot, and Game Maker
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/129867
Solution	We propose continuing to develop and improve the compatibility of Weld, a universal wallet connector, with various game engines and blockchain platforms.
Requested Amount	149,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.50/5
Feasibility	4.33/5
Value for money	3.96/5
6	
Proposal Title	PoolTool Sustaining
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/129290
Solution	Maintain/fund and support the pooltool platform to keep it operational for another year.
Requested Amount	60,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.35/5
Feasibility	4.53/5
Value for money	3.88/5

F13: Cardano Open: Developers

7	
Proposal Title	PyCardano Evolution: Embracing the Chang Hardfork
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/128912
Solution	Update PyCardano to align with Chang hardfork, ensuring compatibility with existing features and adding new ones like DRep voting. This will restore and expand functionality for Cardano developers.
Requested Amount	200,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.32/5
Feasibility	4.21/5
Value for money	3.53/5
8	
Proposal Title	Open Source Arbitrage Bot: Leverage Price Discrepancies Across Cardano DEXs
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/132688
Solution	We will build and open-source bot that users run to auto buy on one dex and sell on another allowing users to capitalize on price differences without manual intervention
Requested Amount	199,000 ADA
Catalyst Assessment Score	
Impact Alignment	3.71/5
Feasibility	3.91/5
Value for money	3.29/5
9	
Proposal Title	Lucid Evolution 2.0 - Maintenance & Development Strategy
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/131815
Solution	We're expanding Lucid Evolution capabilities by tackling technical debt, standardizing modules, and implementing robust testing, making it more powerful and versatile.
Requested Amount	200,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.32/5
Feasibility	4.05/5
Value for money	3.79/5

F13: Cardano Open: Developers

10	
Proposal Title	Plutus V3 for OpShin
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/129125
Solution	The developers and community will work together to add the new features of PlutusV3 and adapt the language to improve performance and speed of Smart Contracts on Cardano!
Requested Amount	100,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.60/5
Feasibility	4.04/5
Value for money	4.00/5
11	
Proposal Title	VYFI: Fix For Incorrect Datums Resulting in "Burnt" Assets on Chain
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/131936
Solution	The solution is to modify our smart contract languages like Aiken, and Plutus to automatically include a way to withdraw when a UTXO is un-spendable. That way users don't unknowingly burn assets.
Requested Amount	96,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.38/5
Feasibility	3.87/5
Value for money	3.54/5
12	
Proposal Title	Breeze - Trading Bot Framework
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/130800
Solution	Provide a uniform trading bot framework to bridge the gap between DEX data providers & DEX aggregating SDKs, while using existing open-source developer tooling.
Requested Amount	174,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.16/5
Feasibility	4.16/5
Value for money	3.63/5

F13: Cardano Open: Developers

13	
Proposal Title	Mesh: Hydra Tools for administrating & interacting with Hydra Heads
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/130856
Solution	Provide tools for developers to integration Hydra to enable end-user operations like interacting with wallet, query UTXOs/ balance and submit transactions and additional helpful functions
Requested Amount	200,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.33/5
Feasibility	4.14/5
Value for money	3.76/5
14	
Proposal Title	Hydra-Enabled On-Chain Subscriptions & Pay-As-You-Go Micropayments: Open-Source Library for Cardano
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/130610
Solution	Hydra-enabled, open-source library for plug-and-play integration of subscriptions and pay-as-you-go payments, enabling fast, scalable transactions to unlock new revenue streams for Cardano dApps.
Requested Amount	140,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.14/5
Feasibility	4.05/5
Value for money	3.81/5
15	
Proposal Title	Cardano Partnerchain Reference Implementation by TxPipe
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/132263
Solution	We'll build a reference implementation of a Substrate partnerchain that can be use by developers in the ecosystem as blueprint / example to build their own specific chains.
Requested Amount	197,143 ADA
Catalyst Assessment Score	
Impact Alignment	4.16/5
Feasibility	4.08/5
Value for money	3.64/5

F13: Cardano Open: Developers

16	
Proposal Title	Cardano Partnerchain SuperNode by TxPipe
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/131930
Solution	We'll build a SuperNode, a new infrastructure tool aimed at SPOs, capable of onboarding and operating multiple Cardano partnerchain nodes using a unified and simple interface.
Requested Amount	198,713 ADA
Catalyst Assessment Score	
Impact Alignment	4.23/5
Feasibility	4.18/5
Value for money	3.91/5
17	
Proposal Title	Lucid Evolution 2.0 - Private Testnet SDK & L2 Provider Integration
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/131819
Solution	This solution leverages Dockerode/Testcontainers for easy control of Cardano private testnet environments and provisions throwaway, on-demand containers for development and testing use cases.
Requested Amount	200,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.21/5
Feasibility	4.14/5
Value for money	3.57/5
18	
Proposal Title	HLabs: unembed plu-ts - the next aiken
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/126985
Solution	We will "un-embed" plu-ts from typescript for it to be a proper compiled language. The goal still to be to use a syntax as similar as possible to typescript.
Requested Amount	200,000 ADA
Catalyst Assessment Score	
Impact Alignment	3.53/5
Feasibility	3.22/5
Value for money	2.77/5

F13: Cardano Open: Developers

19	
Proposal Title	TrustTX AI SDK: Turning Cardano Tx Signing into Easy-to-Read Natural Language, Solving a \$300M problem, making web3 safer.
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/130614
Solution	TrustTX AI SDK converts complex tx details into simple language using AI to help users better understand what they're signing. Easy to integrate SDK, it enhances transparency and security for wallets.
Requested Amount	110,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.52/5
Feasibility	4.00/5
Value for money	3.87/5
20	
Proposal Title	Yepple - Token Staking API, SDK & Dashboard
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/131667
Solution	We will open source a full-stack API, SDK & Web Dashboard for generating, monitoring, and acting on token holder data, enabling secure integrations of incentives for investors throughout applications.
Requested Amount	170,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.50/5
Feasibility	4.20/5
Value for money	4.30/5
21	
Proposal Title	Yepple - React/Next.js Wallet Connector for Mainstream Adoption
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/131641
Solution	We will open-source a React/Next.js wallet connection library with a direct focus on developer and user experience (DX & UX) to make Cardano adoption trivial for web developers around the world.
Requested Amount	110,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.35/5
Feasibility	4.45/5
Value for money	3.90/5

F13: Cardano Open: Developers

22	
Proposal Title	Wider accessibility of automated P2P borrowing - Lenfi Software Development Kit (SDK)
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/130409
Solution	Our solution is to develop the Lenfi SDK—a user-friendly tool that enables developers to easily create automated P2P borrowing transactions, enhancing accessibility and driving DeFi lending growth.
Requested Amount	75,000 ADA
Catalyst Assessment Score	
Impact Alignment	3.62/5
Feasibility	3.19/5
Value for money	3.19/5

F13: Cardano Open: Ecosystem

1	
Proposal Title	Minswap Cardano DeFi Onboarding: Educational Content on How to DeFi on Cardano
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/132634
Solution	This Campaign will focus on "How to DeFi". It will highlight the many different DeFi opportunities within Cardano with exciting, high-quality, easily understandable, & wide-reaching sharable content.
Requested Amount	100,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.37/5
Feasibility	4.13/5
Value for money	3.90/5

F13: Cardano Partners: Enterprise R&D

1	
Proposal Title	Institutional-Grade Layer-2 for Bitcoin DeFi on Cardano, in collaboration with BitcoinOS, Tesseract and More
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/134718
Solution	A Bitcoin-centric Cardano L2 for enhanced scalability, increased speed, and cost-efficiency for DeFi, high-frequency trading, asset minting, and Bitcoin staking - without congesting the L1.
Requested Amount	1,800,800 ADA
Catalyst Assessment Score	
Impact Alignment	No score
Feasibility	No score
Value for money	No score
2	
Proposal Title	Emil Frey Group: Tokenized Vehicle Identities & Maintenance Logs - Guaranteed minimum of 40,000 vehicles up to millions
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/134591
Solution	Emil Frey will create a blockchain-based system that assigns each vehicle a secure digital record, allowing easy access to the car's full service history. Then roll out to at least 40,000 cars.
Requested Amount	1,275,000 ADA
Catalyst Assessment Score	
Impact Alignment	No score
Feasibility	No score
Value for money	No score
3	
Proposal Title	Book.io - Bringing Top Book Publisher to Cardano
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/131707
Solution	Partner with a top IP publisher, accessing 60,000 eBooks/audiobooks exclusively on Cardano, expanding global users, boosting transactions, and establishing Cardano as a leader in decentralized media.
Requested Amount	2,000,000 ADA
Catalyst Assessment Score	
Impact Alignment	No score
Feasibility	No score
Value for money	No score

F13: Cardano Partners: Enterprise R&D

4	
Proposal Title	Iagon & Würth: Platform for Secure 3D Printing and Intellectual Property Management
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/134589
Solution	Iagon and Würth's NFT-Smart Contract platform on ORSY Connect secures 3D IP with decentralized storage, automates royalties, and establishes a global marketplace for 3D printing IP and services
Requested Amount	1,560,000 ADA
Catalyst Assessment Score	
Impact Alignment	No score
Feasibility	No score
Value for money	No score
5	
Proposal Title	Freyr - Proof of Concept Pilot With Iagon Private Distributed Cloud Service and a Fortune 500 company
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/134074
Solution	Iagon Private Distributed Cloud Service (PDCS) will demonstrate a proof of concept with the Fortune 500 company for a pilot app that will be installed on the infrastructure of the company.
Requested Amount	1,880,000 ADA
Catalyst Assessment Score	
Impact Alignment	No score
Feasibility	No score
Value for money	No score

F13: Cardano Use Cases: Concept

1	
Proposal Title	Aiken Smart Contracts for Pooled Lending Protocol on Cardano I Big Blymp
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/131306
Solution	We will develop Aiken smart contracts for a decentralized pooled lending protocol on Cardano, optimizing liquidity for stable assets and enhancing DeFi capabilities on the platform.
Requested Amount	150,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.48/5
Feasibility	4.16/5
Value for money	3.92/5
2	
Proposal Title	Lenfi Xlend- Leveraged trading on UTXO based ecosystem
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/130406
Solution	Xlend is a smart-contract-based leveraged trading client. It will utilize Lenfi V2 pools for liquidity and will allow users to create permissionless leveraged positions in Cardano native tokens.
Requested Amount	150,000 ADA
Catalyst Assessment Score	
Impact Alignment	3.63/5
Feasibility	3.58/5
Value for money	2.84/5
3	
Proposal Title	Obymare: Stablecoin protocol for Cardano I Big Blymp
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/131315
Solution	We will develop a decentralized stablecoin protocol on Cardano, using ADA as collateral, with smart contracts ensuring stability and transparency, boosting Cardano's DeFi ecosystem.
Requested Amount	150,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.14/5
Feasibility	3.76/5
Value for money	3.76/5

F13: Cardano Use Cases: Concept

4	
Proposal Title	BTC ↔ ADA Cross-Chain Swaps - Botty bot
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/128868
Solution	Botty is the all-encompassing UTXO Trading Bot. We will start by integrating the 2 largest UTXO chains: Cardano and Bitcoin, enabling seamless trading on both ecosystems, and eventually cross-chain.
Requested Amount	135,000 ADA
Catalyst Assessment Score	
Impact Alignment	3.73/5
Feasibility	3.14/5
Value for money	3.00/5
5	
Proposal Title	Optim Custom DeFi Credit Lines - For Protocols Bootstrapping
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/132119
Solution	This protocol enables projects to secure fixed-rate credit against various forms of esoteric collateral by providing highly customizable lending terms and collateral options by isolating pools.
Requested Amount	150,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.18/5
Feasibility	3.91/5
Value for money	3.73/5
6	
Proposal Title	Farmroll Bounties: A Decentralized Social Media Rewards System
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/131604
Solution	We will create a decentralized bounty system on Farmroll, where users can offer rewards for social media engagement (for example likes, retweets etc) to boost visibility and growth for small projects.
Requested Amount	150,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.19/5
Feasibility	4.04/5
Value for money	3.85/5

F13: Cardano Use Cases: Concept

7	
Proposal Title	Cardano Ekub: A mobile Platform for Community Savings and Investment Pools
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/132728
Solution	We will create a decentralized system using Cardano to modernize Ethiopia's Ekub system, offering secure, transparent, trustless, and global community savings with ADA and tokenized collateral.
Requested Amount	120,000 ADA
Catalyst Assessment Score	
Impact Alignment	3.46/5
Feasibility	3.23/5
Value for money	2.94/5
8	
Proposal Title	Fanos Crypto Hub: Empowering Ethiopian Youth with Cardano
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/132454
Solution	Cardano-focused educational and innovation hub in Ethiopia, offering workshops, online courses, & community support. This will equip youth with blockchain skills, & entrepreneurship.
Requested Amount	150,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.35/5
Feasibility	3.87/5
Value for money	4.05/5
9	
Proposal Title	Fluid swaps - Trade CNTs against BTC, ETH or MATIC
Proposal Link	https://cardano.ideascale.com/c/cardano/idea/127591
Solution	Utilize Hash Time Locked Contracts (HTLCs) to enable secure atomic swaps between Cardano tokens and assets on other blockchains, such as EVM or Bitcoin, ensuring decentralized cross-chain trades.
Requested Amount	148,000 ADA
Catalyst Assessment Score	
Impact Alignment	3.82/5
Feasibility	3.93/5
Value for money	3.73/5
