

minswap

65 Catalyst Proposal List

Catalyst Fund 12

Introduction

This is the third time the Minswap DAO will be voting on Catalyst with the ADA in its Liquidity Pools, which was **76.9mn ADA** at the time of snapshot. The same process will be followed for this current Fund 12 as it was used for Fund 11 and Fund 10. You can see the documents and procedures followed for previous Funds [here](#).

A group consisting of Minswap community managers and Cardano community volunteers collaborated to filter the 1000+ proposals down to the more manageable number of **50 proposals**. This group of volunteers had to balance the interests of the projects providing and incentivizing Liquidity on Minswap, the Minswap protocol, and the Cardano (mainly DeFi) ecosystem as a whole.

Here is the List of the volunteers and their Twitter for accountability:

- [Elder Millenial](#)
- [Stephcurdy](#)
- [DEGAS Pool](#)
- [Redpa](#)
- [Alfa Pool](#)
- [Amir](#)
- [Cryptofly777](#)
- [Wifestealer69](#)
- [GT](#)
- [HeptaSean](#)
- [Diegomac](#)
- [Mezuny](#)

In addition, a new mechanism was added to the Catalyst Filtering process after being [approved by DAO Governance](#). This proposal suggested a new avenue for **15 Proposals** to make it to the Top 65 List based on their level of support of certain projects within the community, as well as metrics related to Minswap, such as Total Value Locked and trading volumes.

This avenue ranked Proposals based on a formula that combined two types of metrics. Qualitative metrics, measured as engagement metrics from a [promotional tweet campaign](#) and quantitative metrics: measured as Total Value Locked and trading Volume. This enhancement represented an independent initiative, designed to complement the existing catalyst review framework based on broader community feedback. You can see the results transparently in this [google sheet](#).

Guidelines

1. Inclusion of Minswap Labs Proposals: Minswap Labs is the development company that built and actively develops the Minswap DEX. We assume Minswap Liquidity Providers, as some of the active users of the platform are interested in these proposals.

2. Prioritization of Liquidity Partners on Minswap: large projects providing and incentivizing their own Liquidity on Minswap such as: Lenfi, Indigo Protocol, Iagon, Fluid Tokens, etc.
3. Prioritization of Proposals that will significantly impact and improve Cardano developer tooling.
4. Prioritization of Proposals which will be open sourced.
5. Prioritization of Proposals from teams with a history of delivering valuable tools for the Cardano community. Preferably teams who were previously funded on Catalyst, or that have delivered projects which are widely used by the community currently.
6. Other common themes across the proposals include the need for audits and bug bounties, the goal of increasing DeFi usage on Cardano, the desire to strengthen liquidity in the ecosystem, empowering Cardano developers with open-source tools, and upgrading contracts for efficiency and functionality.

Filtering Procedure explained

The filtering approach followed three steps:

- 1. Stage 1 - Coarse Rejection:** Proposals were grouped together and summarized by a large language model. Groups of proposals were either rejected or accepted as follows: 2 people were randomly assigned to each group, and the goal was to evaluate the group of proposals where an accept means all are accepted and reject means all are rejected. If the two reviewers had a difference of opinion on accept or reject, a third reviewer was assigned. This helped to quickly remove large groups of proposals without having to look too closely at them.
- 2. Stage 2 - Specific Rejection:** All the proposals that passed through Stage 1, are taken, and decisions were made to reject proposals that clearly do not fit the criteria. As with the first round, two reviewers were assigned to each proposal. Ties for individual proposals were broken by a third reviewer.
- 3. Stage 3 - Specific Selection:** Of the remaining proposals, each reviewer picked 20 proposals that both fit the criteria and were of interest to the reviewer. Each selection gave a proposal a point, and points were tallied once all reviewers made a selection.

If you want more information, Elder Millennial, founder of Steelswap and long-time Minswap community member explains this method that he came up with in detail in this [interview with CatalystSwarm](#).

Data on Proposals Selected

Number of Proposals: 65

- **Cardano Use Cases:** Product (15);
- **Cardano Open:** Developers (16);
- **Cardano Open:** Ecosystem (10);
- **Cardano Partners and Real World Integrations:** (3).
- **Cardano Use Cases:** Concept (2);
- **Cardano Use Cases:** MVP (19);

Below, you can find each of the Proposals selected for the List. \$MIN Holders will **select the top 30 Proposals** on this List to be upvoted on Catalyst with Minswap LP \$ADA.

You can also find the Problem statement of each Proposal, a link to their full Proposal on Ideascale, the requested amount, and the scores obtained in 3 different areas through Catalyst Assessment.

Proposal Selection

F12: Cardano Use Cases: Product

1	
Proposal Title	Minswap + Fluid Tokens: a “smart token” DEX on Cardano
Proposal Link	https://cardano.ideascale.com/c/idea/122054
Solution	FluidTokens and Minswap Labs join forces to build a DEX specifically designed to handle Programmable token-like assets (CIP113), enabling seamless USDC/USDT integration & future-proofing Cardano DeFi.
Requested Amount	495,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.65/5
Feasibility	4.58/5
Value for money	4.16/5
2	
Proposal Title	Minswap iOS app (open-source)
Proposal Link	https://cardano.ideascale.com/c/idea/121908
Solution	We propose to develop an open-source, audited iOS app for Minswap, Cardano's largest DEX, to provide a seamless & regionally accessible mobile experience, driving greater adoption of Cardano DeFi.
Requested Amount	155,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.70/5
Feasibility	4.34/5
Value for money	4.24/5
3	
Proposal Title	Open Source Arbitrage Bot
Proposal Link	https://cardano.ideascale.com/c/idea/123627
Solution	We will build and open source a trading bot that anyone can run to arbitrage these opportunities to auto buy on one dex and sell on another.
Requested Amount	298,000 ADA
Catalyst Assessment Score	
Impact Alignment	3.96/5
Feasibility	4.21/5
Value for money	3.50/5

F12: Cardano Use Cases: Product

4	
Proposal Title	Summon: Feedback Polls for DReps & SPOs
Proposal Link	https://cardano.ideascale.com/c/idea/122816
Solution	We will provide free Summon Snapshot Polling to all DReps and SPOs so they can gauge the sentiment of ADA Holders who have wallets delegated to them before making governance votes.
Requested Amount	369,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.32/5
Feasibility	4.15/5
Value for money	3.78/5
5	
Proposal Title	SmartPlaces: Advertising Campaign Manager - using Geolocation and Incentivized NFTs
Proposal Link	https://cardano.ideascale.com/c/idea/123413
Solution	Our solution offers geo-targeted, incentivized NFT-based ad campaigns, enabling diverse placements and dynamic pricing control for optimal results with user-consented attributes.
Requested Amount	486,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.15/5
Feasibility	3.89/5
Value for money	3.35/5
6	
Proposal Title	Xerberus Platform Front-end Upgrade
Proposal Link	https://cardano.ideascale.com/c/idea/120986
Solution	We want to build an entirely new interface that enables faster and more intuitive navigation as well as mobile accessibility so that all community members have access to critical risk information.
Requested Amount	87,500 ADA
Catalyst Assessment Score	
Impact Alignment	3.98/5
Feasibility	4.11/5
Value for money	3.72/5

F12: Cardano Use Cases: Product

7	
Proposal Title	Revuto - MASTERCARD integration >> to bring Cardano Native Tokens to Debit Cards supporting crypto <<< and remove friction between crypto liquidity and real-world economic activities → Subscription Payments!
Proposal Link	https://cardano.ideascale.com/c/idea/121727
Solution	Revuto is a mobile app with a built-in non-custodial Cardano wallet, integrated with a debit card issuing (https://linkcy.io/) and banking provider (https://www.paynovate.com/), e-money regulated.
Requested Amount	380,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.54/5
Feasibility	4.35/5
Value for money	4.06/5
8	
Proposal Title	Summon Vaults: Intent Based Treasuries
Proposal Link	https://cardano.ideascale.com/c/idea/123619
Solution	Our solution is to provide an intent-based treasury system so that DAOs can seamlessly interact with the DeFi ecosystem in a safe and transparent way, without bespoke contracts for each integration
Requested Amount	285,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.25/5
Feasibility	4.09/5
Value for money	3.90/5
9	
Proposal Title	[nftcdn.io] NSFW NFT Identification Tool
Proposal Link	https://cardano.ideascale.com/c/idea/123330
Solution	We will create a NSFW detection capability for all NFTs, using advanced machine learning & computer vision to create an automated system capable of detecting explicit content within NFTs
Requested Amount	127,210 ADA
Catalyst Assessment Score	
Impact Alignment	4.22/5
Feasibility	4.41/5
Value for money	3.83/5

F12: Cardano Use Cases: Product

10	
Proposal Title	Iagon: Statur - Reputation Model for Cardano Ecosystem that encourages positive behavior
Proposal Link	https://cardano.ideascale.com/c/idea/123268
Solution	Statur: A system backed by Iagon's storage that securely tracks and manages on-chain reputations in web3, using karma points and badges to evaluate and encourage positive contributions.
Requested Amount	435,511 ADA
Catalyst Assessment Score	
Impact Alignment	4.32/5
Feasibility	4.12/5
Value for money	3.67/5
11	
Proposal Title	Work Courses: Onboarding The \$142B EdTech Industry & The 70M Students Using Digital Learning To Cardano
Proposal Link	https://cardano.ideascale.com/c/idea/122050
Solution	The development and expansion of our White-Label Solutions & Features will empower many industries, businesses, and academia; unlocking capital from the \$142B EdTech industry for Cardano.
Requested Amount	230,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.50/5
Feasibility	4.13/5
Value for money	4.12/5
12	
Proposal Title	Bitcoin Runes on Cardano via Rosen Bridge
Proposal Link	https://cardano.ideascale.com/c/idea/122832
Solution	Rosen Bridge can enable BTC and BTC Runes transfers over to Cardano, enabling increased use of DeFi protocols, increased liquidity for Cardano and interoperability for the ecosystem.
Requested Amount	350,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.58/5
Feasibility	4.44/5
Value for money	4.18/5

F12: Cardano Use Cases: Product

13	
Proposal Title	Orcfax architecture audit
Proposal Link	https://cardano.ideascale.com/c/idea/122929
Solution	Orcfax will procure auditing services for its on-chain and off-chain architecture, perform fixes and enhancements as per auditor recommendations and report on the audit status and outcomes.
Requested Amount	486,000 \$ADA
Catalyst Assessment Score	
Impact Alignment	3.76/5
Feasibility	3.86/5
Value for money	3.27/5
14	
Proposal Title	Orcfax Explorer: Improving "Trust But Verify"
Proposal Link	https://cardano.ideascale.com/c/idea/122950
Solution	The Orcfax Explorer allows users to "trust but verify" the oracle data that their Cardano dApps use. We will enhance it with visualizations, audit log downloads, real-time stats and incident reports.
Requested Amount	182,600 \$ADA
Catalyst Assessment Score	
Impact Alignment	4.30/5
Feasibility	4.04/5
Value for money	3.75/5
15	
Proposal Title	Anastasia Labs - Midgard: Cardano Layer 2
Proposal Link	https://cardano.ideascale.com/c/idea/122254
Solution	Proposing a high-throughput Cardano L2 with fast finality and relaxed SC execution constraints. Enhances scalability, speed, cost-efficiency, enables high-volume transactions without congesting the L1
Requested Amount	500,000 \$ADA
Catalyst Assessment Score	
Impact Alignment	4.56/5
Feasibility	4.20/5
Value for money	3.89/5

F12: Cardano Open: Developers

1	
Proposal Title	Minswap SDK for Stableswap + AMM v2 + LBE v2
Proposal Link	https://cardano.ideascale.com/c/idea/121836
Solution	Develop a robust, open-source SDK with off-chain tools, price feeds, historical data storage, and integration methods for 1) StableSwap, 2) AMM V2, and 3) LBE V2, serving the greater Cardano DeFi.
Requested Amount	127,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.40/5
Feasibility	4.34/5
Value for money	4.03/5
2	
Proposal Title	Boros: Tx submission for intense workloads by TxPipe
Proposal Link	https://cardano.ideascale.com/c/idea/122536
Solution	We will build a generic backend component that serves as a smart, massive mempool. It can be used by dApps directly out-of-the-box as a resilient and performant mechanism for tx submission.
Requested Amount	198,750 ADA
Catalyst Assessment Score	
Impact Alignment	4.50/5
Feasibility	4.22/5
Value for money	3.94/5
3	
Proposal Title	OpShin Audit
Proposal Link	https://cardano.ideascale.com/c/idea/123625
Solution	The auditor will execute a meticulous audit of the OpShin language to ensure comprehensive coverage of edge cases and optimization of efficiency.
Requested Amount	200,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.11/5
Feasibility	4.24/5
Value for money	3.65/5

F12: Cardano Open: Developers

4	
Proposal Title	Griffin: A substrate node that supports Haskell by TxPipe
Proposal Link	https://cardano.ideascale.com/c/idea/122498
Solution	A reference implementation of a Substrate node that uses an UTxO-based ledger and a Plutus VM, allowing the execution of Cardano-like dApps in Substrate-based networks.
Requested Amount	98,750 ADA
Catalyst Assessment Score	
Impact Alignment	4.20/5
Feasibility	4.17/5
Value for money	3.89/5
5	
Proposal Title	Hlabs: Mutexo - an UTxO coordination layer
Proposal Link	https://cardano.ideascale.com/c/idea/120310
Solution	A centralized server and client implementation, that connects to a cardano-node and keeps track of utxos that are "about to be spent" (via a virtual mutex on a utxo: mutexo)
Requested Amount	200,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.11/5
Feasibility	4.20/5
Value for money	3.75/5
6	
Proposal Title	Hlabs: CIP-113 - Finalize the standard for assets with programmability over transfers
Proposal Link	https://cardano.ideascale.com/c/idea/120311
Solution	"CIP-113 is the closest to a standard we can adopt at the moment. We propose to review and complete the latest version to allow better dev experience and implement a library for creating these assets."
Requested Amount	200,000 ADA
Catalyst Assessment Score	
Impact Alignment	3.99/5
Feasibility	3.90/5
Value for money	3.61/5

F12: Cardano Open: Developers

7	
Proposal Title	Redesign of Catalyst's proposal review system and methodology [by TrustLevel, Photrek & Lidonation]
Proposal Link	https://cardano.ideascale.com/c/idea/122134
Solution	Develop an alternative proposal evaluation system for Catalyst that includes a new peer review process and AI support to improve the efficiency, accuracy and fairness of proposal evaluations.
Requested Amount	200,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.28/5
Feasibility	4.14/5
Value for money	3.92/5
8	
Proposal Title	Maintain latest aarch64 (ARM) compliant static binaries for Cardano SPOs, developers and users
Proposal Link	https://cardano.ideascale.com/c/idea/122242
Solution	Provide ongoing support to build a variety of Cardano binaries statically, especially cardano-node and cardano-cli, so any SPO who uses aarch64 devices can benefit from timely updates.
Requested Amount	18,000 ADA
Catalyst Assessment Score	
Impact Alignment	3.90/5
Feasibility	3.93/5
Value for money	3.78/5
9	
Proposal Title	XSY - High-performance on-chain standard library for Plutarch and Aiken
Proposal Link	https://cardano.ideascale.com/c/idea/123158
Solution	We propose a production grade performant and secure on-chain standard library for Plutarch, with potential bindings to Aiken. These will enable developers in building efficient smart contracts.
Requested Amount	200,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.52/5
Feasibility	4.03/5
Value for money	3.76/5

F12: Cardano Open: Developers

10	
Proposal Title	Anastasia Labs - Smart Contract Formal Verification Framework
Proposal Link	https://cardano.ideascale.com/c/idea/122316
Solution	We propose a framework for formal verification of Cardano smart contracts in Coq.
Requested Amount	200,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.45/5
Feasibility	4.19/5
Value for money	3.80/5
11	
Proposal Title	Sustain and Maintain Mesh SDK
Proposal Link	https://cardano.ideascale.com/c/idea/122471
Solution	Maintenance and operations of Mesh SDK, community support and content creation, in order to onboard developers and users to the Cardano blockchain ecosystem.
Requested Amount	200,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.17/5
Feasibility	4.11/5
Value for money	3.72/5
12	
Proposal Title	Blaze: Maintenance, Security Improvements, Testing & Assurances for the Blaze SDK
Proposal Link	https://cardano.ideascale.com/c/idea/122689
Solution	We are building a typescript SDK which we ambitiously intend to be the flagship developer tool of Cardano, we will invest these funds to appropriate improvements, test suites, code analysis of blaze.
Requested Amount	200,000 ADA
Catalyst Assessment Score	
Impact Alignment	3.93/5
Feasibility	3.74/5
Value for money	3.24/5

F12: Cardano Open: Developers

13	
Proposal Title	Blaze: Fully Featured Ledger Emulator, Transaction Builder for the Chang Hard Fork and PlutusV3
Proposal Link	https://cardano.ideascale.com/c/idea/123131
Solution	The MVP Emulator available in the Blaze library will be expanded and reworked to support upcoming Conway/CHANG features. The Emulator may also be used with other transaction builders.
Requested Amount	200,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.54/5
Feasibility	3.99/5
Value for money	3.60/5
14	
Proposal Title	DE-UPLC: Visual Studio Code Extension for Debugging and Visualizing Plutus Bytecode
Proposal Link	https://cardano.ideascale.com/c/idea/123643
Solution	DE-UPLC: A Visual Studio Code extension that provides a debugger and visualization tools for Plutus bytecode, enabling developers to efficiently debug and comprehend their smart contracts.
Requested Amount	200,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.51/5
Feasibility	3.83/5
Value for money	3.86/5
15	
Proposal Title	MLabs - Efficient Contract Upgrades with Yielding Tx Pattern
Proposal Link	https://cardano.ideascale.com/c/idea/121461
Solution	The Yielding Tx Pattern is a novel design pattern. Its segmented approach to scripting logic and tx flows keeps upgrades simple and script bloat limited all within an intuitive monoidal context.
Requested Amount	199,932 ADA
Catalyst Assessment Score	
Impact Alignment	4.42/5
Feasibility	4.40/5
Value for money	4.05/5

F12: Cardano Open: Developers

16	
Proposal Title	OgmiosDotnet: An Open Source .NET Client for Cardano Node Communication
Proposal Link	https://cardano.ideascale.com/c/idea/119104
Solution	The OgmiosDotnet Client provides an easy-to-use .NET integration with Cardano, addressing tool shortages, contributing to boosting Cardano blockchain adoption and innovation in .NET industries.
Requested Amount	60,000 \$ADA
Catalyst Assessment Score	
Impact Alignment	4.02/5
Feasibility	3.80/5
Value for money	3.74/5

F12: Cardano Open: Ecosystem

1	
Proposal Title	Minswap Cardano DeFi Onboarding: Education Program
Proposal Link	https://cardano.ideascale.com/c/idea/120755
Solution	This Cardano DeFi Education Campaign will focus on Minswap V2 through a guide, special video content and a DeFi Learn 2 Earn style campaign through the Work.Courses platform to attract more users.
Requested Amount	100,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.32/5
Feasibility	4.32/5
Value for money	3.58/5
2	
Proposal Title	Minswap Cardano DeFi Onboarding: Incentive Program
Proposal Link	https://cardano.ideascale.com/c/idea/120873
Solution	We aim to create a framework for an Incentive program designed to onboard more users to Cardano DeFi. This is a PoC for doing this on Cardano, focusing on Minswap first.
Requested Amount	100,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.41/5
Feasibility	4.14/5
Value for money	4.04/5
3	
Proposal Title	Minswap Cardano DeFi Onboarding: Marketing Program
Proposal Link	https://cardano.ideascale.com/c/idea/121875
Solution	To deploy a marketing campaign to market Cardano and its DeFi ecosystem (through Minswap) in a manner that incentivises user onboarding causing for adoption of the chain.
Requested Amount	100,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.15/5
Feasibility	4.21/5
Value for money	3.94/5

F12: Cardano Open: Ecosystem

4	
Proposal Title	Token2049 Singapore Rare Social Cardano Event with Media & Marketing - Powered by Rare Network / Rare Evo
Proposal Link	https://cardano.ideascale.com/c/idea/121390
Solution	Rare Network, hosts of Rare Evo, will produce a Cardano community side event & related media at Token 2049 Singapore '24, to cross-pollinate & further showcase the strength. of the chain in SEA region.
Requested Amount	100,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.22/5
Feasibility	4.28/5
Value for money	3.88/5
5	
Proposal Title	DeTask: A Cardano Bounty Platform for developers and non-technical talent.
Proposal Link	https://cardano.ideascale.com/c/idea/122801
Solution	DeTask helps talent contribute to cardano projects through bounties and freelance gigs, in exchange for earning in CNTs.
Requested Amount	70,000 ADA
Catalyst Assessment Score	
Impact Alignment	3.49/5
Feasibility	3.25/5
Value for money	3.14/5
6	
Proposal Title	Consensus Hong Kong Rare Social Cardano Event with Media & Marketing - Powered by Rare Network / Rare Evo
Proposal Link	https://cardano.ideascale.com/c/idea/121388
Solution	Rare Network, hosts of Rare Evo, will produce a Cardano community side event & related media at Consensus Hong Kong '25, to cross-pollinate and further showcase the strength of the chain in China.
Requested Amount	100,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.14/5
Feasibility	4.08/5
Value for money	3.71/5

F12: Cardano Open: Ecosystem

7	
Proposal Title	Lido Nation Cardano Parameters Explorer
Proposal Link	https://cardano.ideascale.com/c/idea/120571
Solution	A multimedia hub for Cardano community & newcomers alike to learn about the parameters to include explanatory articles, podcast episodes, public discussion, q&a, and a timeline of parameter changes.
Requested Amount	100,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.37/5
Feasibility	3.82/5
Value for money	3.59/5
8	
Proposal Title	Demystifying Cardano: A Bootcamp for Beginners
Proposal Link	https://cardano.ideascale.com/c/idea/123639
Solution	Master Cardano without Coding: Earn rewards and verifiable proof of knowledge for building a sustainable future on the Cardano blockchain.
Requested Amount	20,500 ADA
Catalyst Assessment Score	
Impact Alignment	4.22/5
Feasibility	4.03/5
Value for money	4.01/5
9	
Proposal Title	SocialFi: Building Bridges - Cardano Summit 2024 Side Event - Dubai
Proposal Link	https://cardano.ideascale.com/c/idea/123293
Solution	"Building Bridges" side event at Cardano Summit 2024 Dubai fosters collaboration between projects, enterprises & community, featuring networking, panels, & keynote.
Requested Amount	100,000 ADA
Catalyst Assessment Score	
Impact Alignment	3.88/5
Feasibility	3.97/5
Value for money	3.33/5

F12: Cardano Open: Ecosystem

10	
Proposal Title	Onboarding via physicals: Bringing first-timers to Cardano - Danketsu
Proposal Link	https://cardano.ideascale.com/c/idea/122750
Solution	By partnering with the IRC (1 of the largest global humanitarian aid organizations), we will improve & simplify onboarding to Cardano via phygital & access to IRC's vast social & financial networks.
Requested Amount	100,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.15/5
Feasibility	3.90/5
Value for money	3.68/5

F12: Cardano Partners and Real World Integrations

1	
Proposal Title	finest Investments Tokenization Launchpad V.2 by NMKR, Fluid and IAMX: BaFin-compliant Compartment for Access to Capital Markets for Cardano projects
Proposal Link	https://cardano.ideascale.com/c/idea/123216
Solution	Enable funding for Cardano projects and other products through electronic securities in a legally compliant manner, using compartment solutions to meet regulatory standards and manage risks
Requested Amount	770,000 ADA
Catalyst Assessment Score	
Impact Alignment	not available
Feasibility	not available
Value for money	not available
2	
Proposal Title	BIG x NMKR x yellow house: Decentralized Transfer Marketplace for Esports Players
Proposal Link	https://cardano.ideascale.com/c/idea/125714
Solution	Create a Proof-of-Concept decentralized transfer marketplace for esports players, focusing on efficient and transparent player transfers in partnership with BIG - professional Esports team.
Requested Amount	1,400,000 ADA
Catalyst Assessment Score	
Impact Alignment	not available
Feasibility	not available
Value for money	not available
3	
Proposal Title	Tokenization of Real World Assets (RWA) - Nairobi Securities Exchange / Empowa
Proposal Link	https://cardano.ideascale.com/c/idea/125802
Solution	The creation of RWA tokens for affordable housing, enabling capital raising, tracking cashflows, ownership and returns – expanding on the existing payments application built by Empowa on Cardano.
Requested Amount	1,835,000 ADA
Catalyst Assessment Score	
Impact Alignment	not available
Feasibility	not available
Value for money	not available

F12: Cardano Use Cases: Concept

1	
Proposal Title	devada.xyz - Cardano Developer Discovery Platform (F12)
Proposal Link	https://cardano.ideascale.com/c/idea/122626
Solution	A web platform where developers building projects on Cardano can register, forming a database of individuals with their technical skills, education, experiences, languages, portfolio, and reputation.
Requested Amount	99,982 ADA
Catalyst Assessment Score	
Impact Alignment	3.90/5
Feasibility	3.42/5
Value for money	3.51/5
2	
Proposal Title	Mercury: Financials & TB Export
Proposal Link	https://cardano.ideascale.com/c/idea/121910
Solution	Design a tool that helps collect and process data available on the blockchain ledger into an organized structure that is compatible with ERP software and make necessary financial reports (BS and P&L).
Requested Amount	78,140 ADA
Catalyst Assessment Score	
Impact Alignment	4.22/5
Feasibility	3.96/5
Value for money	3.88/5

F12: Cardano Use Cases: MVP

1	
Proposal Title	BTC/ETH smart accounts on Cardano
Proposal Link	https://cardano.ideascale.com/c/idea/120749
Solution	<p>Our solution is:</p> <p>A library to create smart accounts on Cardano with ETH or BTC wallets</p> <p>An opensource repository</p> <p>A demo dapp to interact</p> <p>This will require writing onchain and offchain code.</p>
Requested Amount	286,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.07/5
Feasibility	3.34/5
Value for money	3.55/5
2	
Proposal Title	TapTools: Enable Free Access to TapTax for All
Proposal Link	https://cardano.ideascale.com/c/idea/119960
Solution	We will provide TapTax to the Cardano community for free, allowing all users to accurately file their taxes and comply with local tax regulations seamlessly.
Requested Amount	225,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.28/5
Feasibility	4.17/5
Value for money	3.89/5
3	
Proposal Title	Lending & Borrowing Aggregator
Proposal Link	https://cardano.ideascale.com/c/idea/123565
Solution	All in one platform that aggregates all the lending and borrowing opportunities on Cardano into one simple UI.
Requested Amount	240,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.01/5
Feasibility	3.94/5
Value for money	3.60/5

4	
Proposal Title	MAYZ Cardano Index Funds: Escrow Smart Contracts
Proposal Link	https://cardano.ideascale.com/c/idea/121684
Solution	Enhance user participation in MAYZ Protocol Cardano Funds by simplifying the process using new Escrow Contracts, allowing users to deposit only a portion of the Fund's tokens.
Requested Amount	267,441 ADA
Catalyst Assessment Score	
Impact Alignment	4.28/5
Feasibility	4.00/5
Value for money	3.94/5
5	
Proposal Title	Cardano Layer 2: Hydrozoa protocol for lightweight and flexible Hydra Heads for Cardano
Proposal Link	https://cardano.ideascale.com/c/idea/123560
Solution	Implement an MVP of the Hydrozoa protocol, which improves upon Hydra Head with a direct single-step open transaction, easy commits/decommits, simpler/cheaper L1 code, and flexible membership.
Requested Amount	300,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.34/5
Feasibility	4.45/5
Value for money	3.84/5
6	
Proposal Title	On-Chain Subscriptions & Pay-As-You-Go Protocol with UTXO Locking Mechanism
Proposal Link	https://cardano.ideascale.com/c/idea/123008
Solution	Smart contract-enabled OnChain subscription protocol with pay-as-you-go features, fostering new revenue models through micropayments in SaaS, gaming, & creator economy, where users only pay for usage.
Requested Amount	116,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.37/5
Feasibility	4.05/5
Value for money	3.84/5

F12: Cardano Use Cases: MVP

7	
Proposal Title	Do you want a Go Cardano node? Because this is how you get a Go Cardano node!
Proposal Link	https://cardano.ideascale.com/c/idea/122096
Solution	We will develop an open source Cardano node capable of serving blockchain data, building on our prior funded project Catalyst work and other work independently developed by Blink Labs.
Requested Amount	291,800 ADA
Catalyst Assessment Score	
Impact Alignment	4.43/5
Feasibility	4.35/5
Value for money	4.02/5
8	
Proposal Title	MAYZ Protocol Audit
Proposal Link	https://cardano.ideascale.com/c/idea/119919
Solution	MAYZ Protocol is a decentralized, permissionless, and non-custodial protocol that allows the creation of Cardano Native Token Funds managed by its community members.
Requested Amount	167,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.18/5
Feasibility	3.97/5
Value for money	3.75/5
9	
Proposal Title	DAO Suisse - Compliant DAO Launcher on Cardano
Proposal Link	https://cardano.ideascale.com/c/idea/123442
Solution	Online launchpad that makes it easy to launch a compliant DAO entity on Cardano, keeping as much as possible online, giving summoners clarity on set-up costs and expected future costs.
Requested Amount	198,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.29/5
Feasibility	3.95/5
Value for money	3.76/5

F12: Cardano Use Cases: MVP

10	
Proposal Title	TapTools: Develop Mobile App for Android and iOS
Proposal Link	https://cardano.ideascale.com/c/idea/119966
Solution	We are developing an app for Android and iOS to elevate the mobile experience on Cardano, incorporating advanced features and a notification system to enhance functionality and improve accessibility.
Requested Amount	155,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.31/5
Feasibility	4.13/5
Value for money	3.95/5
11	
Proposal Title	Adatag - A Universal NFT based Username Service on the Cardano Blockchain
Proposal Link	https://cardano.ideascale.com/c/idea/123473
Solution	Adatag is a fully decentralized, open-source username service on Cardano, enabling users to mint unique, NFT-based usernames securely and transparently, utilizing IntegriTree to ensure data integrity
Requested Amount	100,000 ADA
Catalyst Assessment Score	
Impact Alignment	3.90/5
Feasibility	3.12/5
Value for money	3.34/5
12	
Proposal Title	Buy ADA instantly by bank transfer
Proposal Link	https://cardano.ideascale.com/c/idea/119980
Solution	We're offering an exchange solution where users only have to do a bank transfer to receive ADA in their self-custodial wallets.
Requested Amount	200,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.23/5
Feasibility	3.87/5
Value for money	3.72/5

F12: Cardano Use Cases: MVP

13	
Proposal Title	Cardano on BigQuery: open, fast and easy querying of on-chain data
Proposal Link	https://cardano.ideascale.com/c/idea/122374
Solution	We have already built a PoC where we export the Cardano on-chain data to BigQuery, using db-sync (see link 2). We will make this PoC a reliable, production-ready solution & move it to the next level.
Requested Amount	157,500 ADA
Catalyst Assessment Score	
Impact Alignment	4.30/5
Feasibility	4.07/5
Value for money	3.97/5
14	
Proposal Title	SNEKbot: A Telegram Trading Bot to Onboard 900M Monthly Active Users to Cardano
Proposal Link	https://cardano.ideascale.com/c/idea/122755
Solution	We will enhance SNEKbots capabilities to enable a seamless trading experience directly through Telegram and Discord, providing the easiest and fastest onboarding process to the Cardano ecosystem.
Requested Amount	300,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.24/5
Feasibility	4.23/5
Value for money	3.71/5
15	
Proposal Title	Snekx: Cardano's Best Platform to Kickstart and Promote New Communities and Digital Assets
Proposal Link	https://cardano.ideascale.com/c/idea/122838
Solution	We'll create a platform that supports token creators by centralizing tools and visibility, promoting their ideas without requiring market, blockchain or coding knowledge.
Requested Amount	300,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.19/5
Feasibility	4.19/5
Value for money	3.75/5

F12: Cardano Use Cases: MVP

16	
Proposal Title	Iagon Network Explorer V1
Proposal Link	https://cardano.ideascale.com/c/idea/123358
Solution	We will develop a node network on Substrate-parachain technology harnessing IOG's partnerchain framework to interface with Cardano and other chains while managing Iagon's compute intensive operations.
Requested Amount	218,750 ADA
Catalyst Assessment Score	
Impact Alignment	4.12/5
Feasibility	3.96/5
Value for money	3.90/5
17	
Proposal Title	Cardano powered i-commerce
Proposal Link	https://cardano.ideascale.com/c/idea/123397
Solution	Establish capabilities of interactive digital commerce through an innovative, customisable web-based framework, built for Cardano integration.
Requested Amount	280,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.35/5
Feasibility	3.94/5
Value for money	3.77/5
18	
Proposal Title	Boosting Cardano's Share in Web3 Gaming.
Proposal Link	https://cardano.ideascale.com/c/idea/122354
Solution	Our initiative aims to elevate Cardano as a key player in blockchain gaming, significantly boosting its market cap and active user wallets.
Requested Amount	300,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.01/5
Feasibility	3.95/5
Value for money	3.78/5

F12: Cardano Use Cases: MVP

19	
Proposal Title	Anvil x Nuvola: Collateralization Hub
Proposal Link	https://cardano.ideascale.com/c/idea/120650
Solution	We propose to create a Collateralization hub, that would allow users to collateralize future rewards into on-chain proof, creating an asset that is able to unlock liquidity for the participant.
Requested Amount	245,000 ADA
Catalyst Assessment Score	
Impact Alignment	4.11/5
Feasibility	3.90/5
Value for money	3.66/5
